EDUCATION

B.SC COMPUTER SCIENCE
Lagos State University

2023 – Present | CGPA: 4.25/5.0

TECHNICAL SKILLS

Languages:
- Python, C#, HTML/CSS, JavaScript

Backend/Frameworks:
- Django, ASP.NET, React
- PostgreSQL, REST APIs

Developer Tools:
- Git, Docker, VS Code, Visual Studio, Redis, Celery, Google

CORE COMPETENCES

Problem solving & Analytical thinking
Team Collaboration
Project Management
Communication Skills
Time Management

INTERESTS

Technology for business optimization
Process Automation
Data-Driven Decision Making

LANGUAGES

English (Fluent)
Yoruba (Fluent)

PROFILE

Computer Science student with hands-on experience using Python Django, ASP.NET Core with modern frontend frameworks and tools. Proven ability to deliver client-focused solutions through freelance and team-based projects. Passionate about leveraging technology and analytical thinking to real-world business problems and improving operational efficiency.

PROFESSIONAL EXPERIENCE

INTERN SOFTWARE DEVELOPER • 2026 – PRESENT
Bitrow Technologies

- Developing scalable backend services using C# and ASP.NET.
- Collaborating with the team to build, test, and deploy robust web applications.
- Gaining hands-on experience in backend networking and system architecture.

FREELANCE WEB DEVELOPER • 2024

- Delivered custom web solutions for clients by gathering requirements, defining scope, and executing end-to-end development.
- Managed multiple projects simultaneously, ensuring timely delivery and client satisfaction.
- Provided post-development support, troubleshooting issues, and optimizing performance.
- Maintained clear and consistent communication with clients throughout the project life cycle.

PROJECTS

SOFTWARE ENGINEEER | • MAR 2026 - PRESENT
Python, Django, DRF, React, Redis, Spotify API

Trax (Founder)

Trax is a next-generation music analytics platform that goes beyond surface-level stats. Instead of relying on incomplete third-party data, it intelligently tracks real listening behavior - capturing patterns like skips, replays, and actual engagement in real-time.

Built around a **"Smart Sync"** architecture, Trax continuously processes listening activity to deliver more accurate insights into your music habits. From deep personal stats to competitive social leaderboards, it transforms passive listening into something interactive and meaningful.
Whether you're exploring your top tracks, analyzing trends, or competing with friends, Trax gives you a clearer, more honest picture of your music life.

BACKEND DEVELOPER | • DEC 2025

Python, Django, DRF

Timeless Haven

- Designed and developed backend architecture for a hotel management platform handling bookings, user management, and reservations.
- Built RESTful APIs to manage authentication, booking workflows, and administrative operations.
- Structured and implemented database models for rooms, customers, reservations, and payment tracking.
- Collaborated with frontend developers to integrate APIs and ensure seamless system functionality.

FULL-STACK DEVELOPER | • DEC 2024

Python, Django, HTML, CSS, Bootstrap

Coffee Shop (Ecommerce)

- Built a web-based platform enabling users to order coffee, make reservations, and manage purchases seamlessly.
- Implemented multiple payment options including pay-on-delivery and a points-based system integrated with a payment gateway.
- Designed backend logic for order processing, reservations, and user account management using Django.
- Developed responsive frontend interfaces to ensure smooth user experience across devices.
- Structured database models to handle products, orders, users, and transactions.
